

## **2023 P-6 Fizzics Education Incursion**

Dear Parents/Carers,

Fizzics Education will be visiting our school to spark interest in our Science program. They will be performing an exciting and engaging show filled with gigantic bubbles, flying toilet paper, hair-raising electricity experiments, levitating beach balls, volunteers on a nail chair, a giant gyroscope, fire balls, coloured shadows, a flame equaliser and much much more!

The purpose of the incursion is for students to experience fun and exciting ways of how objects, solids, liquids, and gases interact. Students will learn about materials of objects and how they can be manipulated. They will explore how heat and forces are transferred. This will link closely to what the students are learning in class. Therefore, it is expected that all students attend this rare and explosive opportunity.

Please find the details below.
